Above: A 523rd Fighter Squadron jet takes off Monday night with the help of the 27th Operations Support Squadron in the control tower. The F-16s were forced to return to base due to problems with their tanker escort. Left: The 27th Maintenance Group moves excess equipment at the CDF while ensuring that all 523FS equipment made it onto the KC-10. Below: Pallets, equipment and seats are maneuvered into position to be loaded onto the KC-10.

In the deployment processing line, Staff Sgt. Angela Custer and Staff Sgt. Jessica Henry of the 27th Medical Group ensure all Airmen are current with their vaccinations before their departure of Cannon. Depending on the location and duration of a deployment, certain vaccines are required. This is only one of many checkpoints at the Deployment Processing Center. The Family Support Center and other agencies from the legal office, to the base chapel are present to resolve any last-minute problems Airmen may encounter before leaving.
